

Dialon Capsule

Dialon - Anti-Diabetic capsule

Dialon is practically used in conjunction with modern anti-diabetic medicines to have better glycaemic control and quality of life in terms of various symptoms of diabetes. Dialon cannot substitute insulin but it can reduce dependence on insulin by stabilizing or by reducing the dosage of insulin.

Some special natural herbs like neem, methi, katuki, haldar and vijsar etc are use in formulation of the dialon capsule. It helps to increases the production of insulin and minimizes its peripheral destruction. There is no fear of side effect of the medicine.
